Paris – 02/05/2017

CLARANET CHOOSES WALLIX TO SECURE
ITS e-HEALTH SERVICE OFFERING

WALLIX GROUP, a software company providing cyber security and governance solutions for information systems access (Privileged Access Management – PAM), chooses WALLIX ADMINBASTION Suite to secure data access for e-health clients and meet the compliance requirements of the French Ministry of Health's HDS accreditation for data host providers.

A two-pronged challenge

HDS-accredited since 2010, Claranet is Europe's leading supplier of hosting services and managed hosting services for critical applications as well as one of the leading hosted services provider for the health sector in France through its Claranet e-Santé™ offer - a positioning that requires the implementation of traceability systems for e-health platforms access.

It also manages the outsourcing and remote access requirements of the IT divisions of clients that range from hospitals to SaaS platforms, software editors, medical device providers and start-up companies.

Wide-scale deployment of Bastion from WALLIX

A trusted provider for health care sector clients, Claranet uses Bastion from WALLIX to guarantee ironclad secure access to hybrid cloud environments for administrative teams and users from the private and public sectors - an invaluable solution that allows both Claranet and its clients to safely access and manage their platforms.

Today, access to all of the e-health platforms hosted by Claranet migrates via Bastion, accounting for around 700 servers, more than 500 users, 120 clients and approximately 70 same-time connections.

As well as the flexibility it offers administrators, Bastion also helps to heighten awareness amongst users of best practices for data protection and simplifies information systems governance.

"Bastion has become the reference for the e-health sector. It is a trusted product that reassures our clients. Today, Claranet is a hosted provider that is recognized for offering its clients maximum security and traceability for user connections and events on e-health platforms. Bastion helps us achieve our targets and has proven its worth for audits, the detection of intrusions and with requests from France's data protection agency, the CNIL. We are very pleased with the e-health offer and, down the line, will be looking to extend Bastion to Claranet Web and then to the rest of our park" said **Emmanuel Novice, eHealth Market Director for CLARANET.**

"We are delighted to be able to work alongside such a recognized provider on their e-health offer. This collaboration is confirmation of the successful technological ramp-up of our solution for a sector that remains central to our development. Thanks to WALLIX ADMINBASTION, Claranet has a custom-fit resource that is perfectly suited to its data security needs, is easy to use, needs no intermediary agent and can be adapted to their infrastructure - all benefits which allow them to focus on their core business" said **Xavier Lefaucheux, VP Sales for WALLIX Group**.

About WALLIX Group

A software company providing cyber security solutions, WALLIX Group is the European specialist in privileged account governance.

In response to recent regulatory change (NIS/GDPR in Europe and OVIs in France) and the cyber security threats affecting all companies today, the WALLIX ADMINBASTION Suite (or WAB Suite) helps users protect their critical IT assets: data, servers, terminals and connected objects. The suite is the first market solution to have been awarded first-level security certification (CSPN) by France's National Cybersecurity Agency (ANSSI) and thus meet all of the criteria for regulatory compliance.

WALLIX accompanies more than 400 companies and organizations on a day-to-day basis, securing the access to more than 100,000 hardware and software resources. Its solutions are marketed through a network of more than 90 resellers and trained and accredited integrators. Listed on Euronext under the code ALLIX, WALLIX Group is a leader on the PAM market with a strong presence throughout Europe and EMEA. Alain Afflelou, Dassault Aviation, Gulf Air, Maroc Telecom, McDonald's, Michelin, and PSA Peugeot-Citroën trust WALLIX to secure their information systems.

WALLIX ADMINBASTION Suite was a winner at the 2016 Computing Security Awards and has been rated Best Buy by SC Magazine. The company is a member of BPI Excellence, a champion of the Pôle Systematic Paris Region cluster and a founding member of the Hexatrust grouping of cyber security companies.
