WITH PSA GROUP, WALLIX CONFIRMS BASTION'S STRONG FIT WITH THE CYBER SECURITY NEEDS OF INDUSTRIAL CORPORATIONS

France's world-class car maker, PSA Group, continues its deployment of Privileged Access Management (PAM) solution WALLIX Bastion for the detection of cyber threats and the analysis of digital evidence linked to security incidents. Today, WALLIX Bastion forms an integral part of PSA Group's security policy, ensuring:

- Compliance with internal security requirements and external regulatory obligations (including BALE II)
- "Security by design": all privileged user connections to information systems and equipment are done via WALLIX Bastion
- Continuity and quality of service

An integration process that is scalable and adapted to major corporations

Launched as a pilot project in 2011, WALLIX Bastion is now a centralized and integral component of PSA Group's Identity and Access Management (IAM) and Configuration Management Database (CMDB) solutions. Bastion feeds PSA's SIEM¹ system, allowing its SOC² to detect security alerts in real time and analyze incident data. To ensure a high degree of availability and a balanced load, PSA currently has a centralized infrastructure of 8 bastions which control and track access to several thousand UNIX servers.

"We are continuing to roll out WALLIX Bastion as it has proven to be a reliable solution that meets our security requirements and can be integrated within our global architecture, particularly the automated systems that are crucial to our operating processes as a major industrial group. We have every confidence that WALLIX will continue to be a supportive partner going forward" said **Thierry Hec**, Security Expert at PSA Group

¹ SIEM: Security Information and Event Management

² SOC: Security Operations Center

Quality services and flexible solutions for administrators

It was through a communications and onboarding campaign that PSA's security expert was able to federate its administrators around the project. Today, all administrators must go through Bastion to connect to a server, tightening the overall security of information systems whilst still maintaining the same quality of service whatever the circumstances (in nominal mode or during a Disaster Recovery Plan).

"This project is the result of the relationship of trust that has been built between PSA Group and WALLIX, and it illustrates the functional and technological development of our software suite. We meet the strategic challenges of major industrial players that need a solution that is easy to integrate and that is robust and rapidly operational. Awarded first-level security certification (CSPN), our Bastion technology enables us to help these clients with their security policy governance and IT infrastructures" said **Xavier Lefaucheux**, VP Sales Western Europe at WALLIX.

ABOUT WALLIX

A software company providing cyber security solutions, WALLIX Group is the European specialist in privileged account governance.

In response to recent regulatory change (NIS/GDPR in Europe and OVIs in France) and the cyber security threats affecting all companies today, the WALLIX ADMINBASTION Suite (or Bastion Suite) helps users protect their critical IT assets: data, servers, terminals and connected objects. The suite is the first market solution to have been awarded first-level security certification (CSPN) by France's National Cybersecurity Agency (ANSSI) and thus meet all of the criteria for regulatory compliance.

WALLIX accompanies nearly 500 companies and organizations on a day-to-day basis, securing the access to more than 100,000 hardware and software resources. Its solutions are marketed through a network of more than 90 resellers and trained and accredited integrators. Listed on Euronext under the code ALLIX, WALLIX Group is a leader on the PAM market with a strong presence throughout Europe and EMEA. Alain Afflelou, Dassault Aviation, Gulf Air, Maroc Telecom, McDonald's, Michelin, and PSA Peugeot-Citroën trust WALLIX to secure their information systems.

WALLIX AdminBastion Suite was a winner at the 2016 Computing Security Awards and has been rated Best Buy by SC Magazine, as well as being named among the PAM leaders in the Product and Innovation categories in the KuppingerCole 2017 Leadership Compass report. The company is a member of Bpifrance Excellence, a champion of the Pôle Systematic Paris Region cluster and a founding member of the Hexatrust grouping of cyber security companies. In 2017, WALLIX GROUP was included in Forbes France's Futur40 ranking of fastest-growing listed companies.
