

First multiple sales for the new Prodways ProMaker LD-10 3D printer

Paris, April 9, 2018, 7:00 am

Prodways Group has today announced the first simultaneous order for two ProMaker LD-10s from a front-running North-American dental laboratory.

The sale is symbolic in several respects. It illustrates the successful launch of the new ProMaker LD-10 developed by Prodways Technologies in 2017 to expand the MOVINGLight® range to new segment of dental laboratories requiring industrial machines priced below €100,000. Above all, it validates the recognition and quality of 3D printing production machines from Prodways. This is effectively the first time ever that a new client has placed an initial order directly for two machines. The order could be followed by other purchases, depending on how quickly the production gets up to speed.

These two ProMaker LD-10s will be installed during the 2nd quarter of 2018, and at set production speed will consume several hundred kilos of [3D printing resins](#) per year.

The development of the new generation of ProMaker LD-10 [dental 3D printers](#) is based on the success of Prodways' exclusive MOVINGLight® technology. It has seriously impressed major players in the dental industry (manufacturers of teeth aligners, top laboratories and dental production centers) with a unique combination of high precision and productivity on major manufacturing platforms.

The success of the ProMaker LD-10 dental 3D printer is further confirmed by its nomination as [Professional 3D printer of the year in the Polymers category by the reference media 3D Printing Industry](#) and will be exhibited on Prodways booth at the AMUG conferences to be held April 8-12 in St Louis, USA.

The sale also once again confirms the quality and accuracy of products printed by Prodways machines ([13 February 2018 press release](#)), particularly for high-scale production applications such as dental models or orthodontic protectors

About Prodways Group

PRODWAYS GROUP is a specialist in industrial and professional 3D printing with a unique positioning as an integrated European player. The group has developed right across the 3D printing value chain (software, machines, materials, parts & services) with a high value added technological industrial solution. PRODWAYS GROUP offers a wide range of 3D printing systems and premium composite, hybrid and powder materials (SYSTEMS division). The company also manufactures and markets parts on demand, prototypes and small production run 3D printed items in plastic and metal (PRODUCTS division). The Group targets a significant number of sectors, from aeronautics to healthcare.

In 2017, the company generated revenue of €34.8 million, including close to 40% outside of France. Building on revolutionary and proprietary technology, MOVINGLight®, PRODWAYS GROUP today has global visibility in the industrial 3D printing sector and with leading customers.

PRODWAYS GROUP is a Groupe Gorgé company.
