

LONDON, 11th May 2021

COCA-COLA EUROPACIFIC PARTNERS

Coca-Cola Europacific Partners plc (CCEP) today hosts a virtual investor event following implementation of the acquisition of Coca-Cola Amatil Ltd

Following the implementation of the Scheme of Arrangement to acquire Coca-Cola Amatil Ltd on 10 May 2021, CCEP is today hosting a virtual investor event for institutional investors and analysts. The meeting will be hosted by Sarah Willett, Vice President, Investor Relations & Corporate Strategy. Key speakers will include Chairman Sol Daurella, Chief Executive Officer Damian Gammell, Chief Financial Officer Nik Jhangiani, and General Manager for the newly named API (Australia, Pacific and Indonesia) business unit Peter West.

Sol Daurella, Chairman of CCEP, said:

"We are excited to welcome Coca-Cola Amatil's great colleagues to Coca-Cola Europacific Partners and look forward to a more diversified future with sustainability at the heart of everything we do. We have a proven track record in successfully bringing together talent, culture and best practice to create value. I truly believe that we can go further together, delivering great service and great beverages in all of our now 29 markets."

Damian Gammell, Chief Executive Officer of CCEP, added:

"This acquisition brings together two of the world's best bottlers whilst strengthening our strategic relationship with The Coca-Cola Company and our other brand partners. It brings an exciting diversity to our business, including exposure to the world's fourth most populous market, a wider portfolio including alcohol and hot coffee, and local in-market expertise. Together with our great business in Europe, we will unlock new, higher growth opportunities. In Australia, Pacific and Indonesia we will accelerate momentum by applying Europe's proven business model, and we will strengthen our European operations by applying learnings from our new markets. This is the start of a journey which will create significant value to shareholders and strengthen our profile as an attractive and sustainable total return investment opportunity."

Investor meeting highlights

- **Structurally higher growth platform**

API's faster growing markets create a larger and higher growth addressable market for the combined business

- Non-alcoholic ready to drink of c.€125 billion¹ and set to grow by around 3% per annum² (FY22-25)
- Hot Coffee of c.€75 billion³ and set to grow by around 4% per annum² (FY22-25)

This is supported by attractive long-term macro fundamentals. Australia and New Zealand are expected to see GDP and population growth ahead of Western Europe over the medium-term. Indonesia, the world's fourth most populous country, has a young population, and is undergoing rapid urbanisation with a growing, more affluent middle class. It is expected to grow GDP at over 5% over the medium-term⁴.

^[4] 2025 real GDP year-on-year growth rate; source: IHS Markit

- **Significant performance improvement opportunities supported by best practice sharing and a strengthened relationship with The Coca-Cola Company (TCCC)**

There is significant potential to improve performance, led by a strong local management team and supported by a wealth of developed and emerging market experience across Europe's senior management team.

- Australia - business returned to revenue growth in 2019 after 6 years of decline, providing a solid base from which to further benefit from the reorientation of its portfolio with TCCC, winning with customers by focusing on joint value creation, accelerating in e-commerce and building on capabilities like revenue growth management
- In Indonesia, where penetration of sparkling beverages is low but with proven demand, there exists significant headroom for growth
- And the Pacific business, led by New Zealand, is a great business from which to leverage learnings
- CCEP will go further together through building on the best of both businesses to drive growth and scale faster as one, from people to digital and of course sustainability - both businesses have a strong, shared focus in this area, each with leading credentials. Together they will align commitments to go further together and faster.
- From an efficiency perspective, the two businesses will continue on their individual journeys to become ever more efficient and will be even leaner as one. The ongoing and pre-announced efficiency programmes - Accelerate Competitiveness in Europe and Fighting Fit in Australia - remain on track. In addition, the transaction will create further opportunities in areas such as procurement, supply chain and group functions. CCEP estimates that around €60-80 million of efficiency savings will be delivered over the next three years, weighted to FY22 onwards.

- **Value creating for shareholders**

The transaction will create attractive value for shareholders, with immediate EPS accretion and an expectation that ROIC¹ will cover WACC² in around 5 years. CCEP also intends to maintain its c.50% dividend payout ratio¹ on a larger earnings base, thereby generating enhanced returns.

- **Focused on returning to target leverage within 3 years driven by stronger cash generation**

CCEP entered into the transaction with both a strong balance sheet and an investment grade rating³, to which it remains fully committed. After acquisition related borrowings of €5.7 billion with balanced maturities and at a weighted effective average interest cost of c.40 basis points. Leverage¹ at close was at around 5 times adjusted EBITDA¹.

CCEP has a balanced mix of debt maturities at an average of 6.5 years, with no financial covenants and an average interest cost of 1.3%. Driven by the stronger cash generation from the combined business, CCEP is focused on returning to target leverage¹ within 3 years, without affecting ongoing organic growth investments.

- **Transaction underpins medium-term objectives**

The transaction underpins CCEP's medium-term annual objectives, which are as follows:

- Low single digit revenue growth
- Mid-single digit operating profit growth
- Mid-single digit diluted EPS growth (excluding share buybacks)
- Return on invested capital improvement of c.40 basis points
- Free cash flow of at least €1.25 billion (after c.5% capital expenditure⁴ as a % of revenue, excluding payments of principal on lease obligations)
- Dividend payout ratio of c.50%
- Target leverage of 2.5 to 3.0 times net debt to adjusted EBITDA

Growth and improvement measures are each comparable and FX-neutral. Mid-term annual financial objectives should be read in conjunction with the note regarding the presentation of alternative performance measures.

^[1] Refer to "Note Regarding the Presentation of Alternative Performance Measures" for further details.

^[2] WACC = Weighted average cost of capital

^[3] Moody's Baa1, stable outlook; Fitch BBB+, stable outlook

^[4] c6% capital expenditure as a % of revenue, including payments of principal on lease obligations

Pro Forma Financial Information

Provided in the appendix to this release on a full year basis for FY20 and FY19, including quarterly revenues and volumes and updated (compared to the pro forma condensed combined financial information prepared in connection with proposed financings of the Coca-Cola Amatil Limited acquisition by CCEP and furnished on Form 6-K on 20 April 2021) to include the actual cost of financing. The proformas are also available in excel format on CCEP's website, www.cocacolaep.com, in the Investors section.

Webcast

CCEP will webcast the main presentation live through its website today beginning at 13:00 BST, 14:00 CEST and 8:00 a.m. EDT. A presentation will be followed by a Q&A session and is expected to last approximately two hours. A replay and transcript will be made available post the event on the website as soon as possible.

About CCEP

Coca-Cola Europacific Partners is one of the leading consumer goods companies in the world. We make, move and sell some the world's most loved brands - serving 600 million consumers and helping 1.75 million customers across 29 countries grow.

We combine the strength and scale of a large, multi-national business with an expert, local knowledge of the customers we serve and communities we support.

The Company is listed on Euronext Amsterdam, the New York Stock Exchange, London Stock Exchange and on the Spanish Stock Exchanges, trading under the symbol CCEP.

For more information about CCEP, please visit www.cocacolaep.com & follow CCEP on Twitter at @CCEP.

Forward-Looking Statements

This document contains statements, estimates or projections that constitute "forward-looking statements" concerning the financial condition, performance, results, strategy and objectives of Coca-Cola Europacific Partners plc and its subsidiaries, including Coca-Cola Amatil Limited and its subsidiaries (together "CCL", and CCL with Coca-Cola Europacific Partners plc and its subsidiaries together "CCEP" or the "Group"). Generally, the words "believe," "expect," "intend," "estimate," "anticipate," "project," "plan," "seek," "may," "could," "would," "should," "might," "will," "forecast," "outlook," "guidance," "possible," "potential," "predict," "objective" and similar expressions identify forward-looking statements, which generally are not historical in nature.

Forward-looking statements are subject to certain risks that could cause actual results to differ materially from CCEP's historical experience and present expectations or projections, including with respect to the acquisition of CCL (the "Acquisition"). As a result, undue reliance should not be placed on forward-looking statements, which speak only as of the date on which they are made. These risks include but are not limited to:

1. those set forth in the "Risk Factors" section of CCEP's 2020 Annual Report on Form 20-F filed with the SEC on 12 March 2021, including the statements under the following headings: Business continuity and resilience (such as the adverse impact that the COVID-19 pandemic and related government restrictions and social distancing measures implemented in many of our markets, and any associated economic downturn, may have on our financial results, operations, workforce and demand for our products); Packaging (such as refillables and recycled plastics); Cyber and social engineering attacks and IT infrastructure; Economic and political conditions (such as the UK's exit from the EU, the EU-UK Trade and Cooperation Agreement, and uncertainty about the future relationship between the UK and EU); Market (such as disruption due to customer negotiations, customer consolidation and route to market); Legal, regulatory and tax (such as the development of regulations regarding packaging, taxes and deposit return schemes); Climate change and water (such as net zero emission legislation and regulation, and resource scarcity); Perceived health impact of our beverages and ingredients, and changing consumer buying trends (such as sugar alternatives and other ingredients); Competitiveness, business transformation and integration; People and wellbeing; Relationship with TCCC and other franchisors; Product quality; and Other risks;

2. those set forth in the "Business and Sustainability Risks" section of CCL's 2020 Financial and Statutory Reports including the statements under the following headings: COVID-19 related risks; The Coca-Cola Company (TCCC) and other brand partners relationship risk; Economic and political risks; Cyber risk; Foreign exchange risk; Key personnel risk; Beverage industry risk; Regulatory risk; Corporate social responsibility risk; Climate change risk; Supply chain risk; Litigation and legal disputes risk; Malicious product tampering risk; Workplace Health & Safety (WHS) risk; Business interruption risk; Product quality risk; Fraud risk; and

3. risks and uncertainties relating to the Acquisition, including the risk that the businesses will not be integrated successfully or such integration may be more difficult, time consuming or costly than expected, which could result in additional demands on CCEP's resources, systems, procedures and controls, disruption of its ongoing business and diversion of management's attention from other business concerns; the possibility that certain assumptions with respect to CCL or the Acquisition could prove to be inaccurate; burdensome conditions imposed in connection with any regulatory approvals; ability to raise financing; the potential that the Acquisition may involve unexpected liabilities for which there is no indemnity; the potential failure to retain key employees as a result of the Acquisition or during integration of the businesses and disruptions resulting from the Acquisition, making it more difficult to maintain business relationships; the potential for (i) negative reaction from financial markets, customers, regulators, employees and other stakeholders, (ii) litigation related to the Acquisition.

The full extent to which the COVID-19 pandemic will negatively affect CCEP and the results of its operations, financial condition and cash flows will depend on future developments that are highly uncertain and cannot be predicted, including the scope and duration of the pandemic and actions taken by governmental authorities and other third parties in response to the pandemic.

Due to these risks, CCEP's actual future results, dividend payments, and capital and leverage ratios may differ materially from the plans, goals, expectations and guidance set out in forward-looking statements (including those issued by CCL prior to the Acquisition). These risks may also adversely affect CCEP's share price. Additional risks that may impact CCEP's future financial condition and performance are identified in filings with the SEC which are available on the SEC's website at www.sec.gov. CCEP does not undertake any obligation to publicly update or revise any forward-looking statements, whether as a result of new information, future events, or otherwise, except as required under applicable rules, laws and regulations. Furthermore, CCEP assumes no responsibility for the accuracy and completeness of any forward-looking statements. Any or all of the forward-looking statements contained in this filing and in any other of CCEP's or CCL's public statements (whether prior or subsequent to the Acquisition) may prove to be incorrect.

Note regarding the presentation of Alternative Performance Measures

We use certain alternative performance measures (non-GAAP performance measures) to make financial, operating and planning decisions and to evaluate and report performance. We believe these measures provide useful information to investors and as such, where clearly identified, we have included certain alternative performance measures in this document to allow investors to better analyse our business performance and allow for greater comparability. To do so, we have excluded items affecting the comparability of period-over-period financial performance as described below. The alternative performance measures included herein should be read in conjunction with and do not replace the directly reconcilable GAAP measure.

For purposes of this document, the following terms are defined:

"As reported" are results extracted from our consolidated financial statements.

"Comparable" is defined as results excluding items impacting comparability, such as restructuring charges, out of period mark-to-market impact of hedges and net tax items relating to rate and law changes. Comparable volume is also adjusted for selling days.

"Fx-neutral" is defined as comparable results excluding the impact of foreign exchange rate changes. Foreign exchange impact is calculated by recasting current year results at prior year exchange rates.

"Capex" or "Capital expenditures" is defined as purchases of property, plant and equipment and capitalised software, plus payments of principal on lease obligations, less proceeds from disposals of property, plant and equipment. Capex is used as a measure to ensure that cash spending on capital investment is in line with the Group's overall strategy for the use of cash.

"Free cash flow" is defined as net cash flows from operating activities less capital expenditures (as defined above) and interest paid. Free cash flow is used as a measure of the Group's cash generation from operating activities, taking into account investments in property, plant and equipment and non-discretionary lease and interest payments. Free cash flow is not intended to represent residual cash flow available for discretionary expenditures.

"Adjusted EBITDA" is calculated as Earnings Before Interest, Tax, Depreciation and Amortisation (EBITDA), after adding back items impacting the comparability of year over year financial performance. Adjusted EBITDA does not reflect cash expenditures, or future requirements for capital expenditures or contractual commitments. Further, adjusted EBITDA does not reflect changes in, or cash requirements for, working capital needs, and although depreciation and amortisation are non-cash charges, the assets being depreciated and amortised are likely to be replaced in the future and adjusted EBITDA does not reflect cash requirements for such replacements.

"Net Debt" is defined as the net of cash and cash equivalents less currency adjusted borrowing. We believe that reporting net debt is useful as it reflects a metric used by the Group to assess cash management and leverage. In addition, the ratio of net debt to adjusted EBITDA is used by investors, analysts and credit rating agencies to analyse our operating performance in the context of targeted financial leverage.

"ROIC" is defined as comparable operating profit after tax divided by the average of opening and closing invested capital for the year. Invested capital is calculated as the addition of borrowings and equity less cash and cash equivalents. ROIC is used as a measure of capital efficiency and reflects how well the Group generates comparable operating profit relative to the capital invested in the business.

"Dividend Payout Ratio" is defined as dividends as a proportion of comparable profit after tax.

Additionally, within this document, we provide certain forward-looking non-GAAP financial Information, which management uses for planning and measuring performance. We are not able to reconcile forward-looking non-GAAP measures to reported measures without unreasonable efforts because it is not possible to predict with a reasonable degree of certainty the actual impact or exact timing of items that may impact comparability throughout year.

Unless otherwise stated, percent amounts are rounded to the nearest 0.5%.

Pro Forma Financial Information

The following Pro Forma Financial Information is presented for illustrative purposes only and does not necessarily reflect the results of operations or the financial position that actually would have resulted had the Acquisition occurred at the dates indicated, or project the results of operations or financial position for any future dates or periods. The Pro Forma Financial Information has not been prepared in accordance with the requirements of Regulation S-X of the US Securities Act of 1933, the Prospectus Regulation, or any generally accepted accounting standards.

^[1] Includes the depreciation and amortisation impact of the preliminary acquisition accounting step-up in the fair value of PPE and intangibles.

^[2] Amounts represent the net out of period mark-to-market impact of non-designated commodity hedges.

^[3] Amounts represent restructuring charges related to business transformation activities, excluding accelerated depreciation included in the depreciation and amortisation line.

^[4] Amounts represent the charges recognised by CCL relating to the impairment of Indonesia and Fiji during H1 2020.

^[5] Amounts represent costs associated with the acquisition of CCL.

^[6] Amounts represent the impact of the preliminary acquisition accounting step-up in the fair value of finished goods.

^[7] Amounts represent charges, other than restructuring, classified as non-trading items by CCL which are not expected to recur.
