**2023 annual results,
March 27th 2024 before the opening of the market**

ARCURE

About Arcure

Founded in 2009, Arcure is an international group, specialized in artificial intelligence applied to perception technology for the industry, which develops and markets solutions to enhance the autonomy and safety of industrial machines and robots.

In particular, Arcure has developed Blaxtair®, a state-of-the-art intelligent pedestrian detection solution, improving safety around commercial vehicles in many contexts, including the most difficult environments. Already sold in around several thousands of units in more than 50 countries, Blaxtair® is used by the world's leading manufacturers and is gradually being adopted by machine manufacturers.

Arcure is headquartered in the Paris area, has a subsidiary in the United States and has sales offices in Germany, Spain and Asia.

Arcure is listed on Euronext Growth w (ISIN: FR0013398997 - Ticker: ALCUR). The group recorded an annual €18.2 million revenue in 2023 (84% of which was generated outside France), growing 40% compared to 2022.
